

# **2nd Quarter of the Fiscal Year Ending March 2023 Financial Results Briefing**

---

October 25th, 2022

(Securities Code: 9058)

# FY2022 2Q Key Points

Results

## FY2022 1st Half Results

- Cargo movements are on a recovery trend, and we are responding flexibly to changes in the flow of goods around the world
- Sales increased due to an increase in the number of contracts concluded in the logistics information service business and the expansion of business areas in our business overseas (China)
- Operating profit decreased due to an increase in general administrative expenses associated with digital transformation (DX), strengthening of human resources and overseas expansion for the future
- Net profit increased due to posting a gain on the transfer of the system external sales business

Forecast

## FY2022 Full-Year Forecast

- Cargo movement is expected to recover just like the first half, and sales are expected to increase in all segments in the second half
- A large increase in operating profit is expected in the LM business in the second half, but the decrease in profit in the first half cannot be overcome, and the full-year profit is expected to decrease
- Incorporating upfront investment costs for future growth into the plan, we are revising downward the initial operating profit plan

Return  
to  
Shareholders

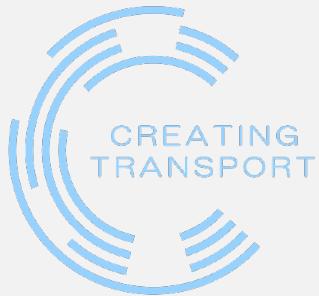

## Return to Shareholders

- The annual dividend forecast is 136 yen, as originally announced, and it will increase for the 22nd consecutive year
- The buying of our own shares, which was started from May 2022, is going as planned

Transportation  
Strategy

## Creating a "Transportation" Mechanism and Speeding Up Business Development

- In the second year of the medium-term management plan, TRANSCOM's goal for "transportation" is becoming more clear
- It has been an important year for speeding things up in creating a "transportation" mechanism
- It is essential to strengthen the core logistics information service business

## Sales

Consolidated sales increased by 5.2% due to an increase in the number of contracts concluded in the logistics information service business and the expansion of business areas in our business overseas

## Operating profit

Overseas business contributed to operating profit, but consolidated profit decreased by 7.5% due to higher payment costs in the logistics information service business and an increase in general administrative expenses.

## Net profit

Consolidated net profit increased 27.7% due to posting a gain on the transfer of the system external sales business

## Sales

Just like the first half, sales in the logistics information service business and overseas business will decline due to the transfer of external sales for traction systems, but full-year consolidated sales are expected to increase by 5.2%

## Operating profit

While the strategic locations of the LM business are in full operation, and overseas business is a driving force, consolidated operating profit is expected to decrease by 2.4% due to an increase in general and administrative expenses

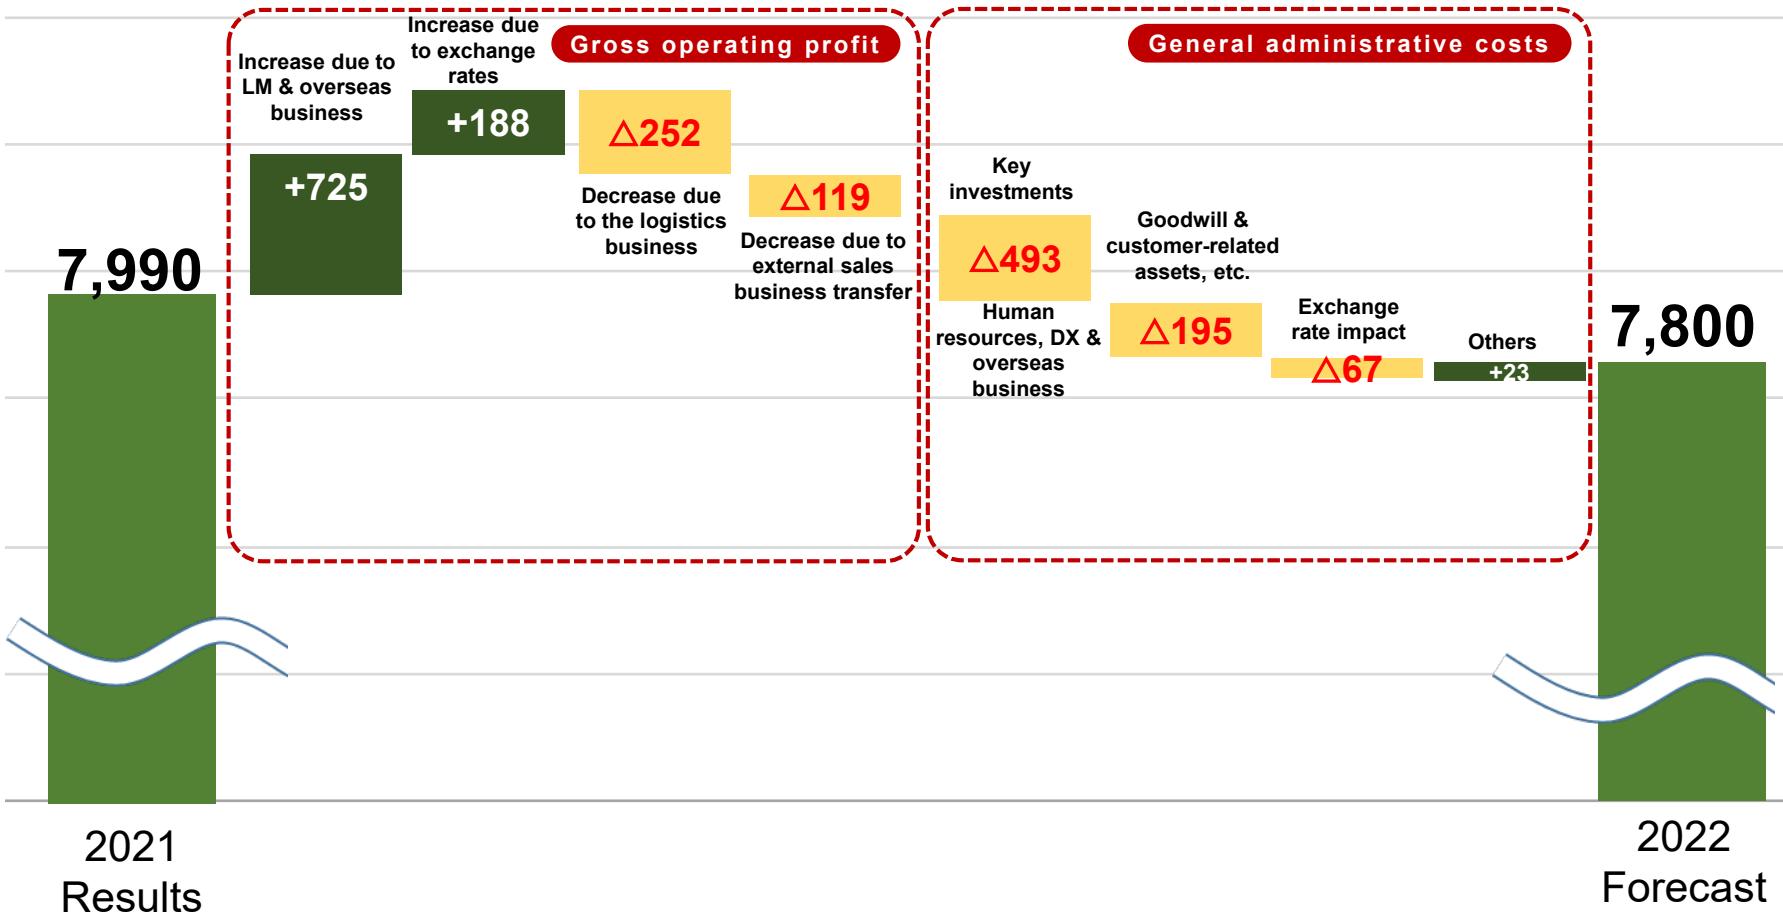

## Net profit

Consolidated net profit is expected to increase 13.4% due to posting a gain on the transfer of the system external sales business

# FY2022 Full-Year Forecast [Change in Operating Profit]

Expect to invest heavily in human resources, DX and overseas expansion for the future. A decrease in operating profit is planned.
